

## phase2 Water Purifier for water bottling

### Boutique water bottling, a growth industry...

Get started in an exciting, growing industry. It seems everyone is drinking bottled or delivered water. Grab a slice of the action, with boutique water bottling in your local area.

phase2 provides the product—the purest drinking water. Using technology found in large water purification systems, phase2 brings efficiency to a smaller scale. The result? Reduced cost and reliable, consistent high purity water.

#### Cost-efficiency saves money.

Normal distillers guzzle thousands of \$ worth of electricity and water each year. Deionizers, filters and reverse osmosis systems chew up money with expensive cartridges and membranes continually needing replacement.

phase2 uses just 14% of the electricity needed by a normal distillation system, and wastes 90% less water. It's thanks to the unique, built-in energy recycling system. phase2 also cuts through consumables and maintenance costs while extending lifespan using just a few inexpensive preventive filters.

phase2 provides you with the best quality water, at extremely low operating cost—so your water bottling business can hook customers on the taste, profit and grow!

#### A system that grows with your business.

It makes sense to plan for the future. That's why phase2 is modular. Each BaseStation can support three Distillation Modules. Buy modules upfront for immediate capacity, or buy in future as your needs grow.

It's a growth-path, and it helps lower your capital expenditure. Only pay for the capacity you need right now, and add low-cost modules when your consumption increases. It's smarter than spending a fortune on a new water purification system each time you expand!

#### Reliability and low maintenance.

You can count on phase2: it's built to last a lifetime, with a robust and durable design that sets it above the rest. Every unit must pass high quality standards, and is progressively tested during manufacture. A comprehensive, extended operational test is also carried out and must be passed flawlessly before each Australian-made unit is shipped.

phase2 follows a proven track record, with years of experience in the field. Almost no maintenance is required – phase2 uses just a few inexpensive 'preventive' filters to protect the system, giving you peace of mind.

#### Where would you use phase2?

- Water bottling, sales & delivery
- Rinse water for washing and cleaning
- Food and beverage preparation
- Other water bottling uses.

#### More advantages of phase2.

- ✓ Easy PNP installation: Just plug it in, prime the tanks, and switch on.
- ✓ Walk away and forget about it. Automatic control takes care of itself - 24/7, 365.
- ✓ No accessories, pumps, or tanks to buy: all-in-one and self-contained.
- ✓ Strong, durable and lightweight. Aluminium frame & BHP Colorbond construction.

#### Long lifespan, always reliable.

- ✓ Highest quality, pre-tested. Proven Australian quality and reliability.
- ✓ Instant help always available. Lifetime phone or email support.
- ✓ Peace of mind. One year manufacturers warranty.

#### Case studies from the real world.

Many businesses are learning that boutique water bottling with phase2 is the way to go. Starting small, with one unit, they grow and grow. Customers love the taste—even willing to pay a premium price for the best water they can get. Boutique water bottlers save on production costs with the low operating costs of phase2, compared to alternate water purification technologies. Bottlers expand and add production capacity as needed, with the modular design of phase2.

Call us for more information on the many successful case studies available.

It's an exciting industry—why not get started?
