

## phase2 Water Purifier for home & farm

### Why not drink the best water?

You deserve to indulge in your health and vitality. And you deserve the best. Why drink tap, spring or bore water when you can drink pure water? Once you taste the difference and feel the health benefit, you will never go back!

phase2 is the ideal ‘whole-of-house’ water purifier. Install in a garage, basement or sheltered from the weather, and distribute water everywhere—kitchen, bathroom, and laundry.

On the farm, use phase2 to purify undrinkable water from bores or dams, and satisfy drinking water needs for your whole homestead. Or during drought, purify bore water to help animals and plants survive.

Indulge in the best...

#### Truly automatic and user friendly.

It’s simple to install phase2. Just plug in, prime the tanks and switch on. Then you can walk away and forget it, thanks to the built-in electronic microprocessor control which allows true automation.

Unlike batch distillers, phase2 uses real-time continuous processing, 24 hours a day, 365 days a year. There’s no filling, emptying or shut-off to worry about – phase2 takes care of itself.

Should any problem arise, you can make a quick and easy diagnosis from the user-friendly colored diagnostic lights. For extra reassurance, phase2 is covered with lifetime phone or email support.

#### Consistent water quality, best taste.

Filters, reverse osmosis membranes and deionizers deliver variable, degrading water purity as time goes on. They become clogged or weakened, or worse, bacteria colonies can begin to grow on the filter media.

You avoid these hassles with the vacuum distillation technology of phase2, because distillation physically separates pure water from contaminants. You really can taste the difference, and see your health & wellbeing improve.

#### Reliability and low maintenance.

You can count on phase2: it’s built to last a lifetime, with a robust and durable design that sets it above the rest. Every unit must pass high quality standards, and is progressively tested during manufacture. A comprehensive, extended operational test is also carried out and must be passed flawlessly before each Australian-made unit is shipped.

phase2 follows a proven track record, with years of experience in the field. Almost no maintenance is required – phase2 uses just a few inexpensive ‘preventive’ filters to protect the system, giving you peace of mind.

#### Where would you use phase2?

- Whole-of-house water purification
- Drinking—health, vitality & taste
- Rinsing, washing and cleaning
- Kitchen & bathroom taps
- On the farm
- Other home & farm uses.

#### More advantages of phase2.

- ✓ Eliminate variation with the consistent, reliable water quality of phase2.
- ✓ No accessories, pumps, or tanks to buy: all-in-one and self-contained.
- ✓ Modular system gives you a growth-path when increased capacity is needed.

#### Extra reassurance.

- ✓ Instant help always available. Lifetime phone or email support.
- ✓ Peace of mind. One year manufacturers warranty.
